

Attached please find information regarding the 5 parcels that Hokah City still shows as having deferred assessments from 1980. Is it the city's intent to keep these deferred assessments indefinitely? Or would the city consider adopting a resolution to cancel these deferred assessments? If so, I could get them off my books. Of course this is a city decision – I wasn't sure after 36 years if the city even realized these were still hanging out there. Thank you!
